PROFESSIONAL SUMMARY

Business Analyst with 7+ years of experience in retail analytics, Power BI reporting, and digital strategy. Proficient in SQL, Adobe Analytics, Python, with expertise in data visualization, statistical analysis, and root cause analysis. Skilled in turning data into decisions that drive growth, reduce costs, and enhance customer experience. Committed to solving business problems through data with measurable outcomes.

EXPERIENCE

❖ Lowe's India

June 2020 - Present

Senior Business Analyst

Bengaluru, India

➤ Digital Pre-purchase funnel:

- Collaborated closely with Product Managers to assess the launch of a new feature on cart/ checkout page by providing visibility into usage metrics of that feature through Adobe Analytics report and further providing deeper customer insights
- Analyzed Cancellation Reasons for Truck Delivery orders suggesting PMs to provide "Alternate Delivery Contact" on checkout page to curb down on order cancellation due to customer not reachable reducing cancellation rates by 2% saving \$ 8M in Revenue
- Assessed shift in tender share and acquisition of new customers after the introduction of a new tender 'Affirm BNPL'; Close to 600 new users acquired in FY 2024
- Detected a PayPal checkout issue through anomaly analysis, enabling timely resolution and avoiding ~\$10K in lost revenue
- Identified reasons for lower conversion rates on Apps compared with web, and showcased how Apps significantly enhance decision-making for in-store purchases by utilizing shopping list and In-store mode where 40% of logged in users completed Store purchases the same day after using App

➤ Omni Business:

- Built analytics dashboards in Power BI to monitor usage of in-store digital tools (QR/barcode scans, In-Store Mode) and their link to purchase behavior, driving insights across ~\$6B of Lowe's retail revenue.
- Uncovered key differences in purchasing behavior between Omni, Digital-only, and Store-only customers to inform business strategy.

➤ Stores and GenAI initiatives:

- Designed a scalable Power BI dashboard to monitor task completion across status, priority, and role—enhancing operational visibility and contributing to an estimated ~\$200M in cost savings.
- Partnered with stakeholders to surface insights into GiG appeasements and fulfillment delays, driving ~\$200K in potential cost savings while safeguarding customer experience
- Led analytics for GenAI tools 'MyLow Companion' and 'MyLow', delivering Power BI dashboards to track adoption and usage; enabled data-driven insights leading enhancements in usability—supporting ~\$300M in projected productivity and efficiency gains.

❖ Mu-Sigma

June 2018–May 2020

Business Analyst

Bengaluru, India

➤ Cost To Serve initiatives:

- Created a cost-to-serve datamart for a leading US retailer, tracing supply chain costs from procurement to sale to enable accurate item-level margin analysis and pricing decisions.
- Used machine learning to identify drivers of product markdowns, reducing pricing inefficiencies and minimizing revenue loss

SKILLS

Languages & Tools:

SQL, Python, Excel, Power BI, Adobe Analytics, Bigquery, Airflow, Power Automate, ChatGPT, Bitbucket

Data Techniques & Concepts:

Data Visualization, Storytelling with Data, Regression Analysis, Statistical Analysis, Anomaly Detection, Root Cause Analysis

PROJECTS & CERTIFICATIONS

- Campaign and Funnel Analysis – Adobe Analytics, SQL
- Google Data Analytics (Coursera)
- Understanding and Applying Linear Regression (Pluralsight)

EDUCATION

- Birla Institute of Technology

Bachelor of Engineering

July 2014 - May 2018

7.9CGPA
