Hiring Manager
ShipBob
Remote – India

Dear Hiring Manager,

I am excited to apply for the Staff Revenue Data Analyst role at ShipBob. With 7+ years of experience in data analytics, business intelligence, and retail strategy at organizations like Lowe's and Mu Sigma, I have a proven track record of delivering insights that drive revenue growth, operational efficiency, and improved customer experience.

At Lowe's, I developed and scaled Power BI dashboards tracking digital and in-store performance, influencing ~\$6B in retail revenue. I have led initiatives from root cause analysis in Adobe Analytics to creating KPI frameworks for multi-million-dollar decisions, including a GenAI rollout projected to boost productivity by ~\$300M. I thrive in cross-functional collaborations, ensuring data solutions align with real business needs.

My expertise in SQL, Power BI (DAX, Power Query, Dataflows, Power Automate), and Python, combined with experience managing multiple high-impact projects, positions me well for ShipBob's fast-paced, data-driven environment. I'm eager to contribute to initiatives like churn modeling, pricing reviews, and sales performance tracking to scale data-informed decision-making across the revenue teams.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and skills can support ShipBob's growth.

Sincerely,
Tushar Yadav
